BACKGROUND

The Ministry of Health and Child Care (MOHCC) has been implementing the Catalysing Covid 19 Action (CCA) project in Zimbabwe since October 2021 with support from Elizabeth Glaser Pediatric AIDS Foundation (EGPAF) through a grant from UNITAID. This is a multi-country project for Cameroon, Kenya and Zimbabwe with a goal to reduce mortality and severe disease from COVID-19 through increasing access to high-quality diagnostics and therapeutics. The CCA project is focusing on the clinical management of severe COVID-19 using therapeutics approved for use in Zimbabwe, evidence generation on the effectiveness of therapeutics and integration models, the procurement of approved therapeutics and diagnostics, and health systems strengthening for responding to emerging health threats.

Avoidable illness and death resulting from non-communicable diseases (NCDs) is a development challenge whose impact threatens human well-being in countries at all levels of development. Lower and middle-income countries – home to more than 80% of NCD incidence – are particularly vulnerable, as they face double burdens of rising NCD prevalence and continuing high levels of infectious diseases. EGPAF is seeking proposals from experienced and qualified consultants to develop an integration framework for Integrated Disease Surveillance and Response (IDSR) and NCDs in COVID activities in HIV, TB and MNCH service delivery at our project sites. We invite proposals from eligible consultants who have experience in developing similar frameworks and are well-versed in the healthcare system of Zimbabwe.

SCOPE OF WORK AND CONTRACTOR DELIVERABLES

The objective of this project is to develop a robust framework that integrates IDSR and Non-Communicable Diseases (NCD) into existing HIV, TB and MNCH activities. The consultant should perform the following activities:

- Conducts a desk review of relevant literature, guidelines and program documents including the assessment of current IDSR and NCD integration practices

In addition, the consultant would be responsible for developing an accompanying toolkit that staff at project sites can use for integrating IDSR and NCDs into their work.
