# CHILDREN TOO CAN GET TB

## Is your child:

- Coughing persistently?
- Wheezing?
- Failing to grow or experiencing weight loss?
- Feverish?
- Feeling tired all the time?
- Refusing to play with others?
- In contact with someone who has tb or a persistent cough?
- Developing swollen lymph nodes?

**Take your child to your nearest clinic/hospital for free TB screening today!**

TB is curable in children. Early diagnosis and treatment can save your child.
